

APPENDIX B to the European Convention for the Protection of Vertebrate Animals used for Experimental and other Scientific Purposes

Statistical tables and Explanatory notes for their completion

(in fulfilment of the requirements in Articles 27 and 28 of the Convention)

Appendix A
Convention
Explanatory Report

Introduction

Under [Article 27](#) and [28](#) of the Convention, each Party shall collect statistical information relating to certain aspects of procedures coming under the Convention and communicate this information to the Secretary General of the Council of Europe who shall publish the information received.

The method used to collect the information is for each Party to decide and, of course, any additional statistical information may be collected to satisfy national requirements. However, in order to facilitate the work of the Secretary General, the information supplied to him must be comparable and in accordance with the attached tables. Data shall be collected per calendar year.

General

The animals to be counted are those which will be put to a use which may cause them pain, suffering, distress or lasting harm (see [Article 1.2.c](#) of the Convention). The counting shall take place when the animals are put to use in a procedure. Each animal shall be counted once only in the same table. Animals not subject to procedures as defined in [Article 1.2.c](#) shall not be counted for the purpose of collecting statistical information in the context of this Convention.

The very nature of biological research makes it inevitable that occasions will arise when it is difficult to decide in which column of a table an animal being used in a procedure should be recorded. There is no right or wrong method of solving the problem, which is one of individual choice. Subject to such directives as the competent authorities may give, it is for the scientist to decide where to record his animal.

It is, however, essential to ensure that no animal is counted twice in the same table.

TABLE 1

The number and kinds of animals used in procedures *during (year) in (Party)*

In this table the total number of animals used in procedures shall be given, this total being broken down by types or classes of animal.

Mice (<i>Mus musculus</i>)	
Rats (<i>Rattus norvegicus</i>)	
Guinea pigs (<i>Cavia porcellus</i>)	
Other rodents (<i>other Rodentia</i>)	
Rabbits (<i>Oryctolagus cuniculus</i>)	
Apes (<i>Hominoidea</i>)	
Other simians (<i>Cercopithecoidea & Ceboidea</i>)	
Prosimians (<i>Prosimia</i>)	
Dogs (<i>Canis familiaris</i>)	
Cats (<i>Felis catus</i>)	
Other carnivores (<i>other Carnivora</i>)	
Horses, donkeys and cross-breeds (<i>Equidae</i>)	
Pigs (<i>Sus</i>)	
Goats and sheep (<i>Capra & Ovis</i>)	
Cattle (<i>Bos</i>)	
Other mammals (<i>other Mammalia</i>)	
Birds (<i>Aves</i>)	
Reptiles (<i>Reptilia</i>)	
Amphibians (<i>Amphibia</i>)	
Fish (<i>Pisces</i>)	
TOTAL	

TABLE 2

The number of animals used in procedures for selected purposes *during (year) in (Party)*

This table is intended to show the number of animals used in the broad areas of: fundamental research, development of new products, safety evaluation, diagnosis of disease, and education and training. In column 1, "medical" includes veterinary medicine.

	1 Biological (including medical) studies of a fundamental nature	2 Discovery, development and quality control (including safety evaluation) of products or appliances for human and veterinary medicine	3 Diagnosis of disease	4 Protection of man, animals and the environment by toxicological or other safety evaluations	5 Education and training
All species					

<i>Selected species</i>					
Rodents and rabbits					
Dogs and Cats					
Primates					

TABLE 3

The number of animals used in procedures for selected purposes for the protection of man, animals and the environment by toxicological or other safety evaluations during (year) in (Party)

This table is intended to give a more detailed breakdown of procedures carried out for the general protection of man, animals and the environment excluding medical purposes. Column 6 includes harmful radiation.

Further classification of Item 4 of Table 2						
	1 Substances used or intended to be used mainly in agriculture	2 Substances used or intended to be used mainly in industry	3 Substances used or intended to be used mainly in households	4 Substances used or intended to be used mainly as cosmetics or toiletries	5 Substances used or intended to be used mainly as additives in food for human consumption	6 Potential or actual hazards of contaminants in the general environment
All species						
<i>Selected species</i>						
Rodents and rabbits						
Dogs and Cats						
Primates						

TABLE 4

The number of animals used in procedures concerned with diseases and disorders during (year) in (Party)

This table is intended to illustrate the number of animals used for medical purposes, including veterinary medicine, with special reference to three areas of human disease which are of particular public concern.

	1 Cancer (excluding evaluations of carcinogenic hazards)	2 Cardiovascular diseases	3 Nervous and mental disorders	4 Other human and animal diseases

All species				
<i>Selected species</i>				
Rodents and rabbits				
Dogs and Cats				
Primates				

Note: When a procedure covers cancer under any item from 2 to 4, the cancer classification should take precedence.

TABLE 5

The number of animals used in procedures required by law *during (year) in (Party)*

An entry in the column "**Party only**" shall be made when the procedure is required by the law of the Party in which the procedure takes place, including international obligations into which that Party has entered (for example as a Party to the Convention on the Elaboration of a European Pharmacopoeia or as a member State of the European Communities).

An entry in the column "**Other Parties only**" shall be made where the aim of the procedure is specifically to meet requirements, including trade requirements, in countries other than the Party, including also requirements of conventions to which the latter is not a party.

"**Both**" shall be used where the procedure is intended to meet requirements of both groups; in this case no entry shall be made in either of the other two columns.

	Party only	Other Parties only	Both
All species			
<i>Selected species</i>			
Rodents and rabbits			
Dogs and Cats			
Primates
